Dr. Catherine Tamis-LeMonda is a Professor of Applied Psychology at New York University-Steinhardt. Her research is focused on infant and toddler learning and development in the areas of language and communication, object play, cognition, motor skills, gender identity, emotion regulation, and social understanding. She also examines the long term implications of early emerging skills for children's developmental trajectories and the role of socio-cultural context on skill development and lagged associations. This work takes place at NYU Steinhardt's Center for Research on Culture, Development, and Education.

Co-Sponsored by the College of Human Environmental Sciences
